Lansing, MI 48909

RE: Opposition to House Bill 4936

Chairman Lund and Members of the House Insurance Committee:

A Michigan driver who has been driving for the last 35 years would have paid a total of \$2,185.81 into the Catastrophic Fund, for an average of \$62.45 per year with no deductible to guarantee that they have the ability to cover any and all reasonable and necessary medical expenses they incur as a result of an automobile accident. This is a real bargain given that the average American Family pays \$15,000 per year for medical insurance with most policies having a \$6,000 deductible. In Michigan, we are able to ensure our youngest drivers (who are most likely to be involved in a serious automobile accident) will have the coverage they need to recover to their maximum potential in the event of a catastrophic injury without bankrupting their families or having them become a burden on the State of Michigan's Medicaid roles.

House Bill 4936 only ensures one thing, and that is the insurance company's bottom line. Did you know that the nation's top ten automobile insurance providers are located outside the State of Michigan? This means that increased revenue earned by the insurance companies will be channeled right out of Michigan.

Please ask yourself, why should we give up the best automobile insurance in the nation only to benefit the insurance companies? Last year State Farm earned 1.8 billion dollars and posted a 61.5 billion dollar net worth. Is that not enough? Do we need to give them more money at the expense of the citizens of Michigan?

In 1992 and again in 1994, Michigan residents voted by a 2/3rd majority that they do not want changes to auto no-fault insurance. What do you think their response will be when they find out that the State government changed it without their knowledge?

Please consider the following before voting on a bill that will have devastating effects on Michigan.

- With private insurance off the hook, Michigan will experience a massive cost shift of \$800,000,000. The State will be affected by a loss of tax revenues (personal, income, business, etc.) higher unemployment claims, and a significant increase to the Medicaid and welfare programs.
- Michigan will also experience a loss of a minimum of 5,200 jobs from the medical and rehabilitation fields. Additionally, individuals with traumatic brain and other catastrophic injuries that require employment in non-traditional sheltered workshops will find themselves unemployed with no other opportunities available to them because of the deficits they incurred in their accidents

Are you willing to sign away unlimited lifetime medical benefits for you and your family, only to shift the cost from the insurance carriers to the State of Michigan? You can leave a legacy of "one of the legislators who saved the Auto No-Fault System", or "one of the legislators who ruined the state of Michigan."

RE: Opposition to House Bill 4936

Chairman Lund and Members of the House Insurance Committee:

Thank you for the opportunity to testify in opposition of House Bill 4936. I testify before you today not only as a licensed vocational rehabilitation counselor and business owner, but as a concerned citizen of Michigan.

It is imperative that we keep Michigan's Auto No-Fault Insurance intact for the financial well being of our State and for the quality of life of anyone who is catastrophically injured in an automobile accident. Please consider the following before voting on a bill that will have devastating affects on Michigan.

- A massive \$800,000,000 cost shift in Medicaid expenditures, lost tax revenue, and to the State's welfare program
- Job loss of at least 5,200 Michigan residents employed in the medical and rehabilitation fields. Additionally, individuals with traumatic brain and other catastrophic injuries that require sheltered workshops will find themselves unemployed with no other opportunities available to them because of the deficits incurred in their accident.
- Not one insurance company has guaranteed lower rates. Michigan residents will find themselves paying the same premium for insurance that will leave them severely underinsured.
- With the average cost of one week of intensive care hospitalization costing \$150,000 - \$200,000 per week, most Michigan residents will find themselves being personally responsible for hundreds of thousands to millions of dollars in medical expenses. This will skyrocket the number of foreclosures and personal bankruptcies in Michigan as the injured individual and their families find themselves financially ruined.
- Studies show that 90% of all drivers in other states choose the lowest PIP coverage because the other options are priced beyond affordability. Since most automotive related traumatic brain injuries occur between the ages of 16 and 34, these individuals will find themselves with their whole life in front of them, but unable to recover to their maximum medical potential because all of their PIP benefits will have already been used. Areas such as vocational rehabilitation and other therapies and rehabs that are crucial to the community reintegration process will be unavailable to them. They will have survived the accident but the final pieces to their recovery puzzle will be gone

Are you willing to sacrifice unlimited lifetime medical benefits for you, your family, and the residents of Michigan by changing Auto No-Fault Insurance?
